Indoor LightBox Profiles

These aluminum profiles are designed to retain a silicone edge gasket (SEG) print on fabric or pvc. An extremely versatile system that allows for quick and frequent changing of prints from large to small in minutes without the need for special tools or parts. SEGflex comes in a wide range of return depths to best suit your project.

Available in single and double sided options. Lightsign have a complete range of LED lighting solutions designed with premium optics to produce uniform illumination across the print.
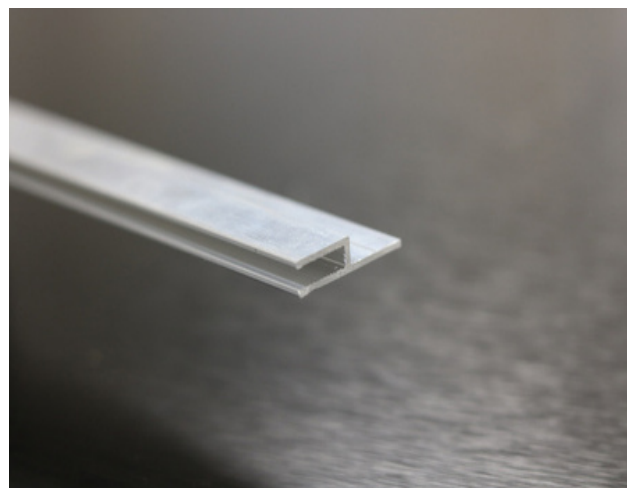

LIGHTSIGN

LSHB30X7LSGN007

The 30x7mm profile is a lightweight cost effective solution for retrofitting, finishing cabinetry or openings with a SEGflex Fabric Lightbox System.
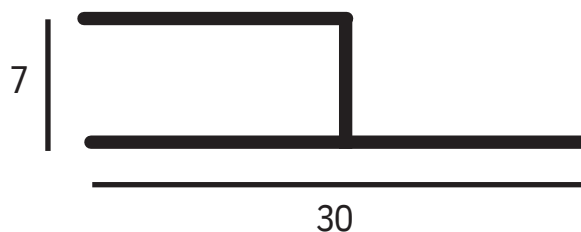

This 30x7 profile has no retaining flange at the base to eliminate shadows. This profile also has a screw position line to assist with mechanical fixing.

Ideal for use in Retail, Trade shows, Hospitality and Events.

The SEGflex Fabric lightbox system is an excellent choice for businesses looking to make a bold statement with their advertising and promotional efforts.
