

IP20 LED COB Strip Lighting

(2700K)

COB (Chip ON Board) LED strip

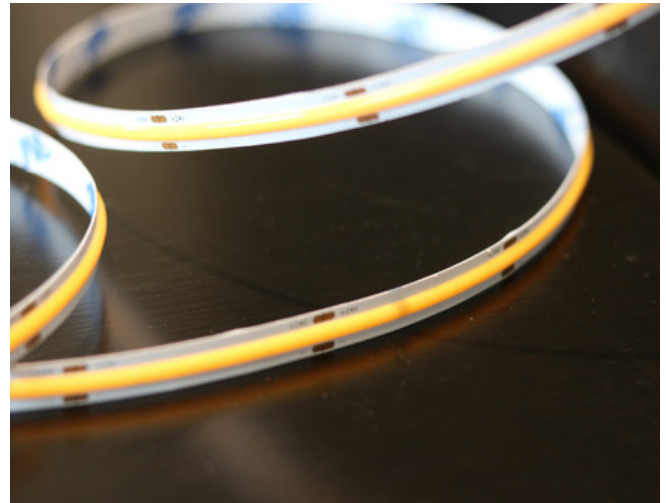

High quality COB Led components allows zero hotspots on illuminated surface. using Uninterrupted LED light output, this LED strip is great for lighting surfaces that are close to the LED strip or surfaces with any reflective properties.

This technology is efficient and has great colour consistency. Great for Shopfit applications, Bars, backlighting from shallow depths.

IP20 Strip Lighting COB LED (10w/m - 24V)

Chip-on-Board LEDs are designed with multiple LED chips placed together on a single circuit board. This arrangement allows for better thermal management and increased light output in a small space. COB LEDs are known for their high efficiency and can produce a more uniform and intense light compared to traditional discrete LEDs.

When you combine the color temperature (2700K) with the COB technology, you get an LED light source that is energy-efficient, provides warm white light, and can be used in various lighting applications such as downlights, track lighting, and accent lighting, among others. These LEDs are popular for their ability to deliver high-quality illumination with a focused beam, making them suitable for both residential and commercial lighting needs.

Power Supply	24V
Power Consumption	10 W/m
Colour Temperature	2700K
IP Rating	IP20
Material	Aluminium
Light Colour	Warm White
Warranty	2 years
Working Temperature	-40°C to 70°C
Certification	CE & RoHS
